

Oat Ingredients from Sweden

Oat Groats
Oat Beta-glucan
Oat Protein

Oats, celebrated for their nutritional benefits, are an ideal clean label ingredient. In our production the oats get processed without any additives, aligning perfectly with the clean label trend and the demand for transparency in food choices.

Our oat ingredients, derived from Nordic oats, not only bring health benefits but also enhance your products. They offer texturizing effects, support health and nutritional claims, provide enrichment, and bring a neutral taste and color to your creations.

From baked goods to dairy alternatives and beyond, our oats offer a clean, nutritious, and versatile solution for various products seeking quality and transparency.

Oat Groats

The oat kernels, undergo heat treatment without any additives. This inhibits enzymes that might cause undesired effects in the endproduct, preserving quality and enhancing nutritional value. Oat groats retain their bran, germ, and endosperm layers, making them a powerhouse of essential nutrients, including dietary fiber, vitamins, and minerals.

Heat-treated oat kernels are incredibly versatile and offer a multitude of uses within the food and nutrition industry. Oat groats boast a hearty, nutty flavor, making them a versatile ingredient. In food and beverage applications, they contribute to creamy textures, impart nutritional value, offer natural sweetness, and ensure consistent quality in both flavor and texture.

PromOat Oat beta-glucan

PromOat Oat beta-glucan is a natural soluble fibre extracted from oats without chemicals. With a 34% beta-glucan content, it is comparably easy to achieve EFSA and FDA-approved health claims. PromOat not only supports health and a clean label but also offers functional benefits like a clean taste, neutral colour, and improved texture, making it a versatile and easy-to-use ingredient for various products.

PrOatein Oat protein

PrOatein Oat protein offers a 55% protein concentration that aligns with the clean label trend through a chemical-free process. PrOatein has a mild taste and is easy to integrate in various formulations. It is the ideal ingredient for nutritional enrichment in various products. Its versatility extends to different diets, including vegan preferences.

Innovation from field to fork

Lantmännen Biorefineries AB is part of Lantmännen, an agricultural cooperative and Northern Europe's leader in agriculture, machinery, bioenergy and food products. With research and operations throughout the entire value chain, we take responsibility from field to fork.
